

Migration report

✓ **GREEN**

Suite green, no residual sites, every edited file exercised by a test.

Summary

Field	Value
Project	task07_cache
Migration	datetime.utcnow → datetime.now(timezone.utc)
Agent version	0.3.0
Run id	blind07-r1
Run started	2026-10-06 09:22:18 IST (+00:00)
Run completed	2026-10-06 14:52:33 IST (+05:30)
Outcome	success
Providers used	nvidia (nvidia/nemotron-3-super-120b-a12b): 3 call(s)
Data egress	3 remote call(s): integrate.api.nvidia.com 3 call(s) / 6,464 B

Headline metrics

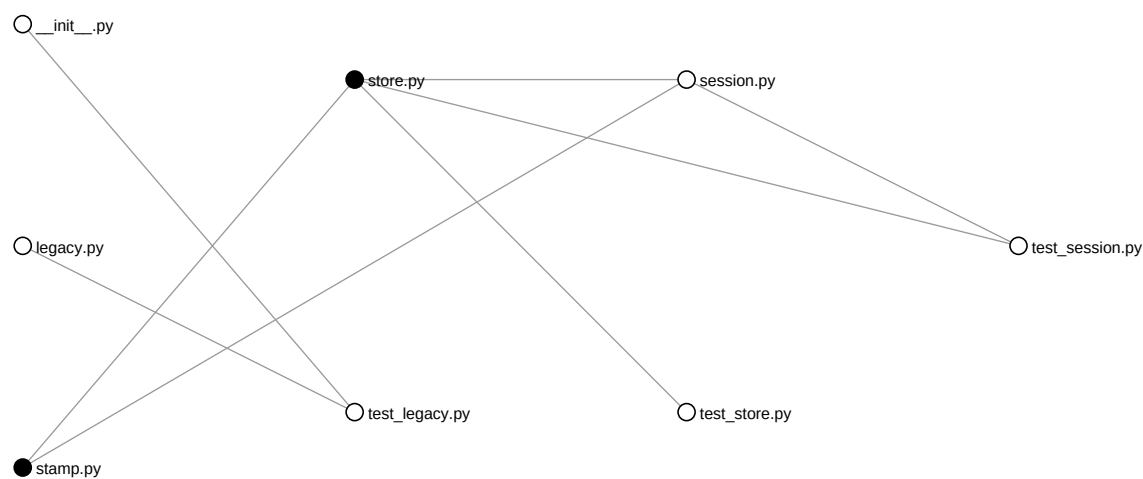

Metric	Value
M1 recall / precision	100.0% / 100.0%
M2 pass rate / regressions	100.0% / 0
M3 tokens / steps / cost	3,327 / 7 / \$0.0032

Report generated 2026-10-06 14:52:34 IST (+05:30)

Repository map

File	LOC	Call sites	Final status
src/svc/__init__.py	0	0	untouched
src/svc/legacy.py	13	0	untouched
src/svc/session.py	8	0	untouched
src/svc/stamp.py	7	1	migrated
src/svc/store.py	19	0	migrated
tests/test_legacy.py	10	0	untouched
tests/test_session.py	8	0	untouched
tests/test_store.py	7	0	untouched

Dependency graph (importer → imported)

Filled: changed by the migration. Showing 8 of 8 files.

Plan

Files are edited in dependency order (FR-3): a module is migrated before the modules that import it, so no batch ever runs against a half-migrated dependency. 0 import cycle(s) were collapsed into single atomic batches, since a cycle has no safe internal order. Batches are capped at 3 file(s), except that a cycle is never split.

Batch	Files	Note
0	src/svc/stamp.py	

Collapsed cycles: none. FR-3 violations: 0.

Execution timeline

Step	Node	What happened
pre	TEST	pre-migration suite: 4/4 passed
0	MAP	found 1 call site(s) in 1 file(s)
1	PLAN	planned 1 batch(es) over 1 file(s)
2	EDIT	batch 0: codemod changed 1 of 1 file(s)
3	TEST	suite after batch 1: 2/4 passed — failing: tests/test_session.py::test_fresh_save_is_fresh, tests/test_store.py::test_round_trip_is_equal
4	CORRECT	attempt 1/3 on tests/test_session.py::test_fresh_save_is_fresh · class behaviour · signature 2b82a2b21890 · suite green
5	TEST	suite after batch 1: 4/4 passed
6	FINISH	success after batch 1/1

Changes

Full patch: migration.patch (2 file(s), +2 / -2).

Verification

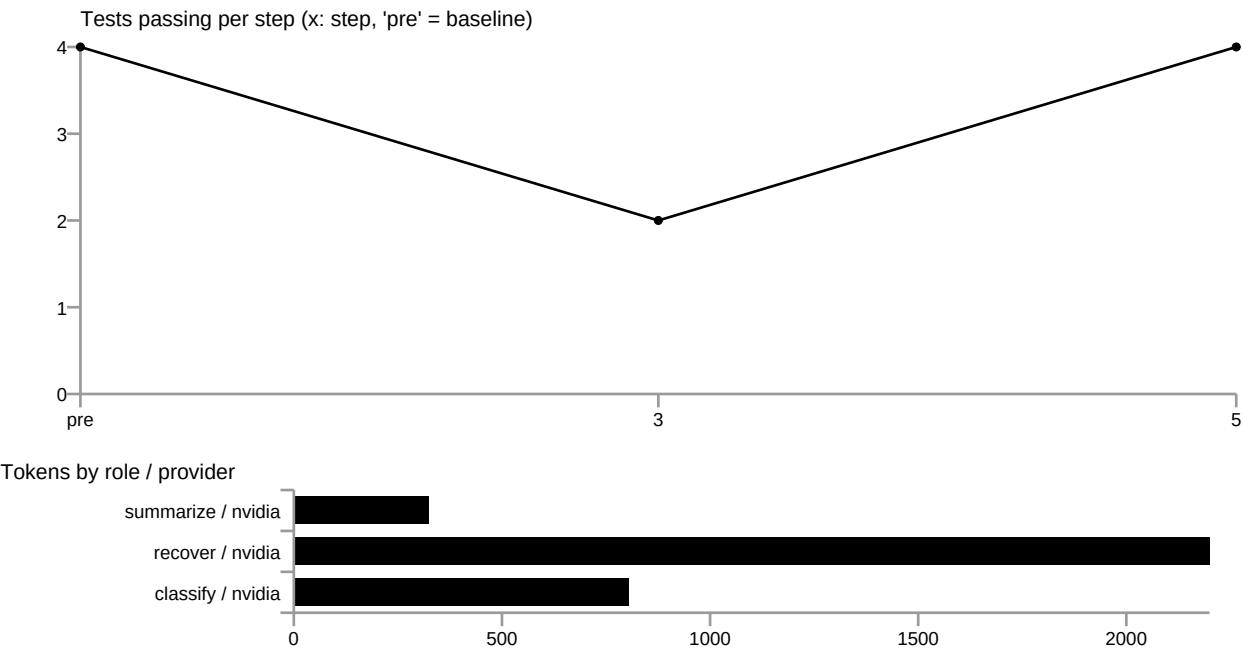

Tests before: 4/4 passed, 0 failed, 0 errors. Tests after: 4/4 passed, 0 failed, 0 errors. Ruff: 2 before -> 1 after; 0 new; exempted by migration contract: UP017 (1 finding(s)).

Check	Result	Evidence
Pre-migration suite green, >= 1 test	✓ PASS	4/4 passed
Final suite green	✓ PASS	4/4 passed, 0 errors
Test oracle untouched (NB-4)	✓ PASS	no test file in the patch or in any attempt
Patch applies to a fresh checkout	✓ PASS	applies cleanly
No residual sites (re-run MAP)	✓ PASS	0 call(s), 0 skipped by design
Every file parsed	✓ PASS	all parsed
Semantic checks	✓ PASS	4/4 passed
No new ruff errors	✓ PASS	2 before -> 1 after; 0 new; exempted by migration contract: UP017 (1 finding(s))
Edge-case accuracy suite (corpus/edge)	n/a	results are for agent 0.2.0, not 0.3.0
Edited files executed by tests	✓ PASS	2/2 files

Semantic check: file	Detail	Result
src/svc/stamp.py	aware, tz resolves to an import	✓ PASS
src/svc/stamp.py	unchanged	✓ PASS
src/svc/store.py	aware, tz resolves to an import	✓ PASS
src/svc/store.py	unchanged	✓ PASS

Coverage: edited file	Changed lines run	Result
src/svc/stamp.py	1/1	✓ PASS
src/svc/store.py	1/1	✓ PASS

Metrics

Issues & residuals

None. Every check passed.

Final status

✓ GREEN

Suite green, no residual sites, every edited file exercised by a test.
